

NEWSLETTER
Planetary Association for Clean Energy

GENERAL INDEX

Volume 1, Number 1 (May 1979)

How the association started (*Senator C. W. Carter*)
The excerpts of February 17 General Meeting
Electromagnetic plague (*William [Van] Bise*)
A campaign against "ecological warfare" (*Alvin Toffler*)
Migma: the last best hope for fusion ? (*Brian Eaton*)
November 27, 1978, United Nations (*UN Office of Public Information*)
Proposal that Canada sponsor international conclave for scientific study of UFO phenomena
Einstein's genius (*A. Michrowski*)
World symposium on humanity (*A. Michrowski*)
Tesla wireless power challenge
Plugging-in wireless power transmissions into conventional distribution systems
Chronicles: Nikola Tesla, man of peace (1) (*Andrija Puharich*) Challenge - the implications of solitons (*A. Michrowski*)
Towards clean energy: voltage controller; food preserver, ionized oxygen; fuel additive

Volume 1, Number 2 (July 1979)

Towards synthesis in international development practices (*Mirko Bunc*)
The development co-financing system (*Mirko Bunc*)
Applied research centre, Grande-Anse, Haiti (*Suzanne Johnson*)
Tesla movement in "first gear" (*Anthony Shennan*)
People's power project challenge
An introduction to the *Iceland Papers* (*Andrija Puharich*)
A mind/brain/matter model consistent with quantum physics (*Thomas Bearden*)
Canada's position on UFO conclave
USSR ELF emissions
Wasteless society is good economics (*John Nelson Mitchell, A. Michrowski*)
Oregon to cope with electromagnetic plague
The economics of goodwill (*Mancur Olson, Jr.*)
Engineering design and appropriate technology course launched
Convivial tools (*Ivan Illich*)
Chronicles: Nikola Tesla, man of peace (2) (*Andrija Puharich*); Challenge - implementing clean energy (*Trevor Constable*) Update commentary: Retrievals of the third kind (*Leonard H. Stringfield*) Towards clean energy: feeding livestock with cellulosic sludge; protein, mineral and vitamin source; water modification

Volume 1, Number 3 (September 1979)

Radionics: the sane alternative to pesticides (*Ted Klich*)
Radionics: here's what tests showed (*John Everett*)
Life control emissions: lessons from insects (*Philip S. Callahan*)
Resistance to pesticides: UN report (*Mostafa Kamal Tolba*)
Update: UNCTSD endorses financing system
Tesla's work with solitons
Planetary energy resources prospects: Montreal meeting

Demonstration of working clean energy systems

Lasting clean energy (*Andrea Bottai*)

Clean energy listings

Chronicles: Nikola Tesla, man of peace (3) (Andrija Puharich); Challenge - the people have the right to know ! (via multimedia) (Walter Tengelsen); Towards clean energy: bladeless pumps and turbines; hydrogen-powered automobile powerplant; thermostat programmer

Volume 1, Number 4 (January 1980)

Clean energy in the 1980's

Biogas, biomass and solar technology for the developing nations (*A. Michrowski*)

Ethanol as motor fuel potentials: some nations can produce it - in 1985 (*Leo Hepner*)

Gasohol developments in Brazil (*TRANET*)

U. S. gasohols in the 1930's !

De-politicizing the energy crisis: implementing Tesla technology (*A. Michrowski*)

Three Mile Island - another look (*E. C.*)

Exciting future for low-heat-grade geothermal sources (*A. Michrowski*)

The promising electrostatic motors (*Oleg Jefimenko*)

Revealing omissions on Tesla's experiments in Colorado Springs

United States joins the ELF club

ELF geomagnetic activity and health

New hazards in international air traffic: ELF standing waves

More on the ELF

Quest for reality: interdisciplinary conference in Cordoba (*Elizabeth A. Rauscher*)

Contest for best Moray technical paper

Good work (*E. F. Schumacher*)

The SO₂ emission-to-mercury poisoning process (*Torgny Schutt*)

Chronicles: Nikola Tesla, man of peace (4) (Andrija Puharich) Challenge - an emerging scientific world-view: the planet as a giant thought (Andrija Puharich) Towards clean energy: near-total efficiency fluorescent lighting; energy amplification system; magnetic motors

Reviews: Messengers of deception: UFO contacts and cults by Jacques Vallée (A. Puharich); The sea of energy by T. Henry Moray

Volume 2, Number 1 (March 1980)

Facing the future creatively

The future-present, year 2000 (*Robert Theobald*)

Some plain talk about energy (*Robert W. Bonner*)

The future of science (*A. Michrowski*)

Future energy situation: a Middle East scenario (*A. Michrowski*)

Bioeffects in brain and other tissues of weak ELF fields (*William Ross Adey*)

Statement by the Pacific Northwest Center for Non-Ionizing Radiation on ELF emissions (*William [Van] Bise*)

Where to go for help for ELF radiation problems ?

"Accepted" United States position on bioeffects of ELF (*A. Michrowski*)

ELF and weather

ELF and aviation safety

Chronicles: Nikola Tesla, man of peace (5) (A. Puharich) Towards clean energy: patents, novel energy devices; spirulina; Reviews: The Iceland papers edited by A.Puharich (T. Bearden); Radios that work for free; The UFO crash/retrieval syndrome by Leonard H. Stringfield

Volume 2, Number 2 (May, 1980)

Evidence of psychokinetic interaction between living systems and nickel anodes in saline cells (*William [Van] Bise*)
Life control infrared maser-like wavelengths (*Philip S. Callahan*)
Towards an inclusive theory of weather: insights from cloudbusting (*James V. DeMeo*)
Soviet scientific research linked to Tesla effects (*A. Michrowski*)
New method of pre-sensing and monitoring volcanic activity at Mount Saint Helens, Washington (*W.V. Bise*)
An overview of ELF characteristics and their influence on man (*Jeanne Morrison*)
The nature of the Canadian government UFO files (*Brian Eaton*)
A legal case for hylozoism
Setback for clean energy in Scandinavia (*Stein Jarving*)
Electromagnetic evaluation-scenario: Tabas helicopter rescue mission (*A. Michrowski*)
Whatever happened to hydronics ? (*Michael Johnson*)
Numbers and space - an intuitive glance (*Patricia Villiers Stuart*)
Chronicles: Nikola Tesla, man of peace (6) (*Andrija Puharich*); Challenge - energy debates and the working scientist (*Bogdan Maglich*)
Reviews: *The spectrum of consciousness* by Ken Wilber (*T. Bearden*); *The shape of things to come* by Gopi Krishna (*H. Granz*); *Energy, earth and everyone* by Medard Gabel

Volume 2, Number 3 (July/August 1980)

Malillumination and biological systems: a challenge to designers (*John Nash Ott*)
Transmutation of the elements in oats: new analyses (*Louis Kervran*)
"The physics of Tao" (*Philip S. Callahan*)
Introducing the magnetic pacer: a countermeasure for environmental electromagnetic pollution (*W. Van Bise*)
A week in the magnetic life of Mount Saint Helens (*A. Michrowski*)
Magnetic pacer presented to USPA
The magnifying transmitter (*Nikola Tesla*)
Tesla's 125th anniversary celebration in 1981: planning developments (*Vladislav A. Tomovich*)
Renewed hope for *Migma*, a non-radioactive fuel fusion (*A. Michrowski*)
World première: *The secrets of Nikola Tesla* (*A. Michrowski*)
Remote-viewing with radionics (*Edith Kermit Roosevelt*)
Advanced Soviet bioenergetic research: recent developments
Chronicles: Towards clean energy: products: full spectrum lighting fixtures, plastic and optical lenses; negative ion generator; Clean energy listings. *Reviews*: *The real war in space*, (BBC TV) (*A. Puharich*); *Ether technology* by Rho Sigma (*Herman Granz*)

Volume 2, Numbers 4 & 5 (February, 1981)

Internal symmetries of physics and parapsychology (*Olivier Costa de Beauregard*)
Communications between molecules of life: ammonia and water (*Philip S. Callahan*)
Ultraweak photon emissions in cells: new vistas in biology (*A. Michrowski*)
Probing into control mechanisms in cellular healing processes: San Francisco initiative (*E. A. Rauscher*)
Cloudbusters as projectors (*Trevor James Constable*)
Innovative research facility (*Elizabeth A. Rauscher*)
Bioelectromagnetics society: San Antonio meeting (*Stephen Dennis*)
Anti-gravity properties of crystalline lattices (*John G. Gallimore*)
Tachyon-field energy conference in Hannover (*Herman Granz*)
Important lessons from plate flutter experiments (*Tom B. Pawlicki*)
Avoiding a third conflict in Indochina: innovative trilateral non-aligned neutrality (*Marek Thee*)
True societal costs of renewable biomass as clean energy (*R. C. Quittenton*)
Focus on the biosphere: public, political, scientific (*J. R. Vallentyne*)

New twist in mathematics and physics: twistor theory (*James B. Beal*)
U. S. government and military sources of UFO related information (*Randolph W. Liebeck*)
ELF activities during the 1977 New York blackout (*Andrija Puharich*)
Research transmitters in Argentina: harbingers of new lessons (*A. Michrowski*)
Cumulative risks of nuclear reactors in large cities (*Gordon Edwards*)
Ion phenomena near a DC powerline (*William Mische*)
ELF experiments in Tromsø, Norway: heating the ionosphere (*Gerhard Strössner*)
Magnetic detection of planetary - wide geologic events (*William Van Bise*)
ELF magnetic seismic detection: follow-up in French territory
ELF events in autumn, 1980
Chronicles: Challenge - how can clean energy be implemented ? (*A. Michrowski*) *Reviews: Excalibur briefing* by T. E. Bearden (*A. Michrowski*); *Topics and terms in environmental problems* by J. R. Holum; *Laying waste: the poisoning of America by toxic chemicals* by M. Bloom (*M. Michaud*); *Home energy for the eighties* by R. Wolfe and P. Clegg

Volume 3, Number 1 (June 1981)

The transistorized coil: a novel, clean energy tool (*Shinichi Seike*)
Remote pumping of electrical fields: magnifying transmitters in action (*William Van Bise*)
Celtic low energy, electromagnetic round towers (*Philip S. Callahan*)
The eye: an electro-chemical transducer (*Morgan B. Raiford*)
Some background on the Prioré machine (*Peter Geldart, A. Michrowski*)
Advances in desalination: the Aul EGD process (*Robert Nelson*)
Implementing a new consciousness (*Frank A. Low*)
Magnetic disturbances produced by UFO and by space shuttle re-entry (*William Van Bise*)
Concrete evidence of biological UFOs from Italy and Rumania (*Luciano Boccone*)
ELF and weather: downburst in Wisconsin (*Brian Eaton*)
Magnetic ELF comparisons with acoustics measurements on Mt. St. Helens (*William Van Bise*)
USSR ELF emissions were predicted for remote viewing and mind control capabilities (*A. Michrowski*)
Developments in remote sensing (*Bernard D. Nossiter, Nicholas Kosanovich, A. Michrowski*)
Master's degree offered in consciousness studies (*Hatha Surrenda*)
Some U. S. Tesla patents misleading (*Monique M. Michrowski*)
Spontaneous electromagnetic radiation from natural dielectrics (*James B. Beal*)
U. S. Tesla stamp in 1983 (*Margaret Starcevic*)
Chronicles: Challenge - one should not start what one is not competent to control (*J. D. Martin*)
Reviews: The encyclopedia of UFOs edited by Ronald D. Story (*Thomas Bearden*); *On a slide of light* by Greta Woodrow

Volume 3, Numbers 2 & 3 (December 1981)

Mechanical energy from anisotropic gravitational fields (MEGA) (*Rudolf G. Zinsser*)
Acoustic decomposition of water by the phonon effect: towards a viable clean fuel system (*Andrija Puharich*)
Notes on the first international symposium on non-conventional energy technology (*Bill Kuhns*)
An international overview of non-conventional energy research (*Rolf Schaffranke*)
... A Saskatchewan follow-up ?
Tesla's secret (*Thomas Bearden*)
Educating for peace (*Brian Eaton*)
ELF effects on avionics (*A. Michrowski*)
U. S. Congress may view consciousness as a science and technology issue (*A. Michrowski*)
Novel techniques for detecting intent (*Elizabeth A. Rauscher, G. B. Houck, Virginia Gruye*)
Chronicles: Challenge - preparing for the coming socio-mental crisis - the dissipation of the simple enthusiasm of living (*Monique M. Michrowski*), *Reviews: Tesla: man out of time* by Margaret Cheney (*Bill Kuhns*)

Volume 3, Number 4 (October 1982)

New Physics for future science: exploring the internal flows

From the Lorentz transformation to the transformation C - the absolute invariance of the Maxwell

C equations and related topics (*Jean Carstoiu*)

Comments on the new Tesla electromagnetics: discrepancies in present EM theory (*Thomas Bearden*)

Conversion of shadow energy into electrical energy using lead batteries (*Shiuji Inomata, Michio Hoshino*)

Comment (*Alejandro Silva Garland*)

A new metrology: organotester/fluidometer (*Trevor James Constable*)

Volume 4, Number 1 (March 1983)

Unease with video display systems

Synopsis: non-linear electromagnetic interactions with living systems

Non-linear electromagnetic interactions with living systems (*Eldon A. Byrd*)

Eyestrain and the visual display terminal (*Helen Feeley*)

Forum on the question of VDTs (*Bill Kuhns*)

Errata and amendments on MEGA, Vol 3,2-3

The implications of scientific illiteracy (*Monique M. Michrowski*)

Chronicles: Nexus: Puharich magnetite synthesis from inorganic solution; revival of Kervran's work; annual meeting; launch of *Raum und Zeit*, ELF in Indian Ocean; clean energy emphasis in South African Economics course

Volume 4, Number 2 (June, 1983)

Paramagnetic pyramid antenna ! levitation in the King's Chamber (*Philip S. Callahan*)

How to make a corrugated round tower sensor (*Philip S. Callahan*)

Formation of AAGFE (*Art Sowden*)

Non-conventional energy technology transfer (*A. Michrowski*)

Report: alternate energy seminar (*George D. Hathaway*)

The Tomaz phenomenon (*Lee Pulos*)

Report on Mufon meeting (*Dennis Stacy*)

Chronicles: Nexus: synergy and coherence in biological systems seminars at Université de Paris; Boston chapter; *Migma* advances; chemical antidotes database; French catalytic heating system

Volume 4, Number 3 (November 1985)

Emerging science

Scientific politics and the future on the earth (*Christopher Bird*)

Fundamental fields and phase information (*Jack Dea*)

Chronicles: Nexus: Institute for Basic Research in Cambridge; *Body Electric* by Robert O. Becker; *Omni* publishes on electromagnetic bioeffects; WHO ELF environmental health criteria report; *Secret of Nikola Tesla* on cable networks; *Globus* computer simulation of key world political and economic relations launched in Berlin; *German association of gravity field energy* a technical society; Nieper's *Revolution in technology, medicine and society*; BBC TV Horizon program on parapsychology; *Bakken Library of electricity in life* collection; British *Independent TV* program on ELF; Marcel Vogel's Psychic research R & D Centre; Orgone bibliography by DeMeo

Volume 4, Number 4 (March 1986)

Future Man: a Montréal perspective

The emerging New Man (*Bernard de Montréal*)

Mental space, mental time (*Monique Ménard*)

Trying to get new technology accepted: a consultant's case of success and failures (*R.S. Ross*)

Field resonance effects (*Alan C. Holt*)

The maze in the haze (*A. Michrowski*)

Inside building illness - IBI and human rights (*Monique Michaud*)

Chronicles: Nexus: Belgian *Macder:* electrical energy from static magnetic field; *Sympathetic Vibratory Physics:* focus on John Keely; planetary grid research at Governors State University; Cayce's *Stabilizers* revived; microwave sickness in radar installations; developments in magnetics; *Rolex* awards; top Soviet geophysicist confirms ELF modifies weather; International Tesla Society symposium; General Electric falsifies full-spectrum research; *Livcell* analysis computer screens develop "rouleaux" in blood - clumps which clog capillaries and cut down blood supply to brain -- sunlight, full spectrum light reverse phenomenon. *Reviews: What we may be* by Piero Ferrucci

Volume 5, Number 1 & 2 (September 1986)

In search of ... Zero Point Energy (*Selby Anderson*)

Nikola Tesla's studies of the eye (*A. Michrowski*)

Ecological economics (*John A. Farrar*)

The development of nonradioactive nuclear technology (*Bogdan Maglich*)

Chronicles: Nexus: Chernobyl incident related to nearby Gomel OTH installation scalar electromagnetic experiment; new European clean energy patents; *Cohering the Zero-point energy* released by Moray B. King; Yull Brown's stoichiometric H and O ratio gas for welding, rust-proofing, engines, tunneling; Marc Seifer's PhD work on Nikola Tesla; Tesla coil builders association; Zagreb Tesla conference; Eric Dollard's modeling of longitudinal waves useful for understanding Tesla technology, electro-gravity; P. Tewari replicates overefficiency with homopolar *N-machine*; Swedish Energy Minister asked to investigate Joseph Newman's machine; Dutch homeopathic innovation at Vitexon b.v.; Los Angeles *Congress of Bio-Energetic Medicine*; Inertial propulsion system, *EZKL*, developed by Brandson Roy Thomson of Winnipeg; Liquid crystal consciousness hypothesis by Bruce H. Lipton may explain how some proteins convert light, sound, ELF, energies into cell communication; scalar convertors from Wolfgang Volkrodt; *German association of gravity field energy* Congress; A. Puharich's discovery of mechanism how near 8 Hz magnetic fields stabilize biochemical elements, normalize cell division; Marcel Vogel notes water pumped around crystal acquires properties of a permanent, fluid magnet. *Reviews: In search of Nikola Tesla* by F. David Peat; *Pulsor: miracle of microcrystals* by George T. F. Yao; *Energy options - real economics and the solar-hydrogen system* by J. O'M. Bockris.

Volume 5, Number 3 & 4 (December 1987)

Emerging medical science

Electrolytic destruction of cancer cells (*Robert O. Becker*)

Contactless magnetic neuro-muscular stimulation (*John A. Orpin*)

Phase conjugate waves: implications in medicine (*Thomas Bearden*)

Reichian connection to healing by touch (*Bernard Grad*)

Nerve regeneration through electroacupuncture (*A. Michrowski*)

An odyssey towards bioenergetics (*John E. Fetzer*)

Current physics theories and the Life Sciences (*John H. Davidson*)

Progress at the *Bio-energetic Medicine Congress* (*A. Michrowski*)

Castor Oil Packs - soft energy medicine (*Frederick Gregory*)

Biosensitivity to extremely weak environmental electromagnetic stimuli (*A. Michrowski*)

Another dimension for psychology (*Roberto Assagioli*)

Additional method for visualizing acupuncture networks (*A. Michrowski*)

Chronicles: Nexus: Princeton School of Engineering research on interaction of human consciousness with electronic and mechanical devices; Menninger Foundation research on consciousness enhancement with "copper wall" energized by weak magnetic field; *Sourcebook project* on anomaly research; inertial propulsion research by Eric R. Laithwaite, Sandy Kidd and Stephen Salter; USSR Gomel OTH ELF transmitter regains operation after Chernobyl incident - affects avionics, weather - US Army Foreign Science and Technology Center briefs on effective counter-measures; Examination of theoretical and clinical significance of 7.6 Hz EEG activity by James Hardt, UC San Francisco; Scientific and Medical Network; Brain activity mapping of advanced meditation

techniques (*Tummo*) by Harvard Medical School's Herbert Benson; seminars on informational aspects of biological systems at Université de Paris; Pipeline company complains that 1000 km away transient DC discharges by Québec Hydro's HV transmission systems accelerate pipeline corrosion; germicidal, detoxifying properties of *Tea Tree* oil and toxic-free ozone (without nitrogen oxide) noted by Daniel J. Bangs; Special issue of *International Journal of Biosocial Research* reviews bioeffects of colour and light on plants, animals and people as researched by John Nash Ott; Israeli conference on interactions of electromagnetic fields with biological systems; Red Cross asks assistance to resolve appropriate technology aspects of locust swarm problems in African nations; Searl effect research by Gunnar Sandberg of University of Sussex; TENS treatise by D. Tapio, A. C. Hymes of LecTec Corp; A.R.E. Clinic in Phoenix verifies castor oil packs boost immune system's effectiveness; *EZKL* inertial propulsion system patented; German firm markets bioelectronic devices; Tesla Book Co. changes ownership; *OTTLite* source; Canada's Prime Minister's Office asks review of Tesla's wireless transmission of electrical energy proposed by WVU (J. F. Corum, J. E. Smith) and is advised by National Research Council of Canada scheme is "actually correct" and "scale model of Tesla's arrangement could be easily duplicated"; Loma Linda University's Benjamin Lau confirms blood circulation enhanced by dilation of arterial vasculature by magnetic ELF; Psychosynthesis conference in Italy. *Reviews: The holistic approach to cancer* by Ian Pearce; *Subtle energy* by John Davidson (*M. Michaud*)

Volume 6, Number 1 (July 1990)

Vacuum energy: coming of age

Vacuum energy: a breakthrough (*Andrei/NOVOSTI*)

Commentary and addendum notes (*Paul Czysz*)

On the new Soviet vacuum energy device: political implications (*Thomas Bearden*)

An introduction to vacuum energy (*George D. Hathaway*)

Scalar current (*Moray B. King*)

Conceptualizing multidimensional interactions in "free energy" research (*A. Michrowski*)

Laboratory generation of electric fireballs (*A. Michrowski*)

ELF signals: current status (*William Van Bise*)

Chronicles: Nexus: Gaston Naessen's achievements: microscope (140,000 X), *somatid* observation, and 714-X (*Camphorminium Chloride*) immune system booster; DeMeo's *The Orgone accumulator handbook*; New Zealand engineer, Robert Adams, develops method of extracting energy from magnets; *in vivo* cellular communication results obtained by Cleve Backster; *EZKL* inertial propulsion system demonstrated in canoe; *Tapping the Zero-point energy* by Moray B. King; advances in iridology for psychological assessments by Denny Johnson; Canada's Minister of Science, William C. Winegard admits Tesla wireless transmission system "is possible in theory" but does not offer "a viable alternative to electrical power transmission technology now in use"; UN's Centre on small energy resources in Rome to co-operate; Doyle Noyes achieves high efficiency heating and cooling system using a scalar convertor antenna; *N-machine* progress in India and Japan; USSR and US ELF emissions cease with superpower reconciliation - Schumann resonance subsides to tenth of pre-ELF emission levels (conducted between 1976-1989) - some independent scalar electromagnetic experimentations continue, results in random weather modification; association recognized by United Nations; Westinghouse supplies photovoltaic power systems; Fetzer Institute re-organized; Institute for Scientific Information launches diskette journal; World Research Foundation upgrades worldwide health information network; Original Rife frequency instrument surfaces at Mayo Clinic - leads to solid-state model replications; WHO European Office in Copenhagen *Non-ionizing radiation* report suggests adverse health hazards associated with ELF fields; *Rolex* awards for enterprise; R. Livingstone notes solar eclipses not coincidental - moon shifts to accommodate eclipses - suggesting that a resonance structure operates on gravity

Volume 6, Number 2 & 3 (May 1991)

Interface: bioenergetics/scalar electromagnetics

In memoriam, Marcel Vogel

The M R T: "microwave resonance therapy": USSR clinical results (*A. Michrowski, Bob Beck, J. Manning*)

Ergonom 400 confirms Royal R. Rife's observations (*Marco Bischof*)

Gaston Naessens: implementing the breakthroughs (*A. Michrowski*)

G-Strophanthin (Wesley James)

The concept of "free energy" (Donald A. Kelly)

Hutchison Effect (John Hutchison)

The Electrophoresis effect (James E. Yehl)

Electro acupuncture: balancing resistance levels (Margot Prenzlau)

Brain transmitters: how they are used (Mediaeko Investigative Reporting Group, Stockholm)

Exceptions to Newton's Laws (James Black)

Belgian "MHD" electric generator (André-Gabrielle Colle)

Resources, networks, sources, support

Tachyon energy applied (A. Michrowski)

Notable rejections by science (Marcello Truzzi)

Scalar electromagnetics in aerials (A. Michrowski)

Brainmapping project at the Monroe Institute (F. Holmes Atwater)

Generation of electric power without electromagnetic induction (Arvind Gupta)

Chronicles: Nexus: French-language *Nouvel Horizon* launched; Troy Reed's working permanent magnet motor; Holy Land treasures may be stored in 1598 in Oak Island, Nova Scotia with Leonardo da Vinci's expertise; Space energy association - SEA/US; De stichting kosmiese energie activities in Netherlands; *Technology Intelligence Report* from Anthony C. Sutton; Progress at Center for frontier sciences at Philadelphia's Temple University; International society for the study of subtle energies and energy medicine (ISSSEEM) gathering; Extraordinary Sciences conference; boundary layer effects obtained by C. R. Possell with Tesla's bladeless turbine; International medical homeopathic organization congress in Kiev; Institute of oriental medicine; V. I. Dokuchayev, electrodynamic theoretician presents longitudinal EM wave theory supported by experiments supporting other vacuum energy research; John Ott indicates ultraviolet light essential for making cell division process possible for pigment *epithelial cells* of the retina; R. O. Becker proposes attention be given *glial cells* of the brain responsible for magnetic, DC potential sensing - *glials* appear to process new *neurons*; vacuum energy research progress in US, USSR, Mexico; Health and Welfare Canada addresses environmental sensitivity; *U. S. Congressional record* of conspiracy to suppress certain innovative cancer treatments by Benedict F. Fitzgerald, Jr., Counsel (August 3, 1953); Fritz Albert Popp confirms ultraweak light emitted by living tissues may be detected by sensitive photomultiplier tubes and Tohoku University follows up with "biophotonics" research; S M Kirov Polytechnic Institute in Tomsk focal point of study of transient and anomalous phenomena; Austrian Rudolf Doczekal's work on conditions where 2nd Law of Thermodynamics invalid for labile states confirmed by B. Schaeffer, W. D. Bauer of Berlin; air pollution affects higher altitude conifers in zones of Central Europe and North America; U.S. Navy produces nuclear products with excess heat in cold fusion experiments; US intersociety energy conversion engineering conference on "advanced energy concepts": zero-point, vacuum energy, Tesla, etc. *Review: Biological transmutations* by C. Louis Kervran; *The L. E. Eeman report* compiled by Tom Brown

Volume 6, Number 4 (July 1993)

Transmutation of radioactive materials with Yull Brown's Gas (Daniel Haley)

Yull Brown's Gas / Anomalous water (Andrew Michrowski)

Vacuum energy developments: the related physics of bioenergetic phenomena (Andrew Michrowski)

Modulation of neurotransmitter function by quantum fields (Glen Rein)

Chronicles: Nexus: Microtonality -music of extended multiple harmonics; Witnessing extraterrestrials leads to suspension of civil liberties in US: 1969 NASA regulations, U.K. Chief of Defense Staff claims cover-up of UFO evidence in Timothy Good's *Above Top Secret*; Corporate crime in US: \$100 billion annually; International Atomic Energy Agency study on health impact of Chernobyl; *Sacred medecines* published: compilation on traditional medicines by WHO; Stephan Marinov demonstrates free-energy prototype; Formation of Tesliana Society, Serbian independent scientists network; Advanced computer-assisted translation system; Alvin Mark's *Lumeloid* and *Lepcon* solar /electric antennae advances with Argonne National Laboratory, EPRI; Center for Frontier Sciences reviews alternative healing for National Institute of Health; Brandson Roy Thornson video demo of smooth-ride inertial propulsion model; Leland I. Anderson documents Tesla's experimental scalar methods and apparati; International Association for New Science and Institute for New Energy; Activation of psi capabilities consequence of new Russia, after fall of communism; New Russian publication, *Aura2*; Transmission of electricity by one wire demonstrated, explained by Dr. Stanislav Avramenko; Dr. Rein's method detects

affects of subtle energy with ultraviolet absorption spectroscopy; Troy Reed secures independent expert evaluation, files for patent for magnetic motor; Fusion Information Center newsletter; Comprehensive multidisciplinary study for the United States Department of Energy uncovers several models linking ELF with cancer initiation; European members of PACE now enjoy co-ordination secretariat based in Germany, first initiative is related to healthy homes.

Volume 7, Number 1 (September 1993)

The PAP-IMI device: longitudinal waves therapeutics (*Panos T. Pappas*)
Neutralization of HIV virus: experimental method (*Robert C. Beck*)
Inertial propulsion: the Thomson EZKL drives (*Thomas Valone*)
Momentum energy in IPE: periodically stored and released (*Brandson Roy Thomson*)
Mobiloscope: independent indicator of movement (*Jaroslav J. Kopernicky*)
Gravity drop experiments: influencing gravity (*Donald Kelly*)
Inertial induction motor (IIM): walking towards lift (*Bill Donovan*)
Chronicles: Nexus: The Aquapol device dries moist walls claims vacuum energy interaction; Edition Freie Energie starts with Rho Sigma books; Raum-Quanten-Motoren lans serial production of fuelless space energy motors (20-30 kW and 190-210 kW); Saoraia Foundation in Denmark; "Hum" complaint gains credibility; hypersensitivity to electromagnetic fields studied by Swedish, U.S., Chinese institutions; Dead Sea Conference on holistic approach to health.

Volume 7, Number 2 & 3 (April, 1994)

Therapeutic architecture: *indoor bioelectrics* (*Richard L. Crowther*)
Our relations with Earth (*Richard L. Crowther*)
We are walking antennas ! (*Eldon Byrd*)
The electricity of life, a partial historical review (*A. Michrowski*)
Counteracting adverse electromagnetic fields (*Eldon Byrd*)
About ions ... and EMF sensitivity (*James E. Yehl*)
Practical EMF pointers (*Richard L. Crowther, A. Michrowski*)
Qigong - a near 8 Hz focused mind activity, scientific evidence (*Eldon Byrd*)
The *MWO* - a revisit and follow-up (*Hessel Hoornveld*)
Advanced clean energy power production, current status (*Toby Grotz*)
Clean Energy Contacts
Networks in vacuum
Early technologies ...
The PAP-IMI device developments
*Chronicles: Nexus: Guenter Poeschl's mixes water and engine fuel ultrasonically; Contact Network International in Netherlands; ENECO established to pursue cold fusion technologies; Yull Brown victim of earthquake; International Science Forum Network symposium on electric propulsion, electrogravity dedicated to T. T. Brown; Ukrainian vacuum field energy developments; Joseph Swenson's experiments for "drawing power from air"; Robert Pavlita's psychotronic generators re-examined; Tesla Engine Builders Association established; John O'M. Bockris overcomes academic resistance; William Philpott's self-help health guide with magnets; Gerald Fischer's evaluation of pulsed magnetic therapy modality; HIV (or any other virus) not cause of AIDS according Peter Duesberg, retrovirus expert; Conference on Science of Subtle Energy; Wingate Lambertson's solid-state system for tapping vacuum energy; Secret underground installations in U.S.; Dale Pond launches *HyperVibes 2.0* database on Keely, Tesla, Cayce, Russell, etc.; Effects of microwave irradiation on food; Canadian government holdings of UFO and abduction reports; Electromagnetic "confusion field" research at Catholic University leads to EMX technology at Honeywell. *Thoughts worth Considering.**

Volume 7, Number 4 (July, 1994)

Electrogravitics developments
The Denver report (*Hal L. Fox, Toby Grotz, A. Michrowski*)

Inertial propulsion: concept & experiment details (*Thomas Valone*)

Neurophone - a bio-responsive scalar wave device (*Patrick Flanagan*)

Advanced antivirus software

Chronicles: Nexus: Wingate A. Lambertson's successful solid state free energy system test results; William J. Fogal and Tom E. Bearden semiconductor improvement provides high AC voltage and current gain; United States Psychotronic Association's (USPA) emerging sciences audio/visual archives; Borderlands BBS as source for unusual documents; International Bio-oxidative medicine foundation developments in hydrogen peroxide modalities; Yugoslav Tesliana Society development in anti-virus and antic-cancer inhibitory micro-funguses; progress with US DOE and Argonne National Laboratory with Dr. Alvin Mark's solar/electric power conversion process. International Association for Technology Assessment and Forecasting Institutions discussion of vacuum energy and Yull Brown's achievements; new Solar-Hydrogen "quick read" guide from International Association for Hydrogen Energy; detailed information (including work plans) about Tesla's engines and pumps from the Tesla Engine Builders Association; Hungarian N-Machine design by Ferenc Gal; heart-rate-variability as indicator of relationship between emotions and the heart and the immune system performance; Japanese government subsidizes projects in cold fusion, new hydrogen energy and N-machines; earth-quake prediction developments at the Geo-Monitor network; HAARP ELF ionospheric heating program going ahead. *In Memoriam:* Rolf Schaffranke, Richard J. Reynolds, Vincent G. Wiberg.

Volume 8, Number 1 (September, 1994)

Potentials in power generation (*Alexander V. Frolov*)

Commentary (*Tom E. Bearden*)

Flanagan's Microcluster colloids - increasing free energy (*Patrick Flanagan, Gael Flanagan*)

Ultraviolet bio-effects - question of multifrequency interaction (*James E. Yehl*)

Power of written archetypal words - triggering survival forces (*Claude Onillon*)

Cloud structure events - recent developments (*Ottawa Secretariat*)

Megatubers

Earth frequency oscillator (*Keith Johnson*)

The future of science (*A. Michrowski*)

Quacks of Medicine ... (*Ralph R. Hovnanian*)

Chronicles: Nexus: previously unpublished Tesla wireless transmission of electricity and particle beam projector material; vacuum energy discussed in Stockholm; UN discussing sustainable energy techniques; Shinichi Seike spheric monopolar magnet; mind control and abuse prevalent; Viktor Schauburger generator pieces supplier; geometry of sound research by Barbara Hero, Robert Foulkrod; Permaculture resources; Keely's *Hydro Vacuo Motor* analyzed by Dale Pond; Tesla and Philadelphia Experiment analysis. *Thoughts worth Considering.*

Volume 8, Number 2 (February 1995)

(Henry) Andrija Puharich (1918-1995): "keeper of the fires of learning" (*Elizabeth Rauscher*)

In memory of Andrija Puharich (*Tom E. Bearden*)

Recent Puharich books

Puharich water splitting system for cars (*Elizabeth Rauscher*)

Twenty years (*A. Michrowski*)

Unipolar magnetic spheres - power generation from spacetime (*Shinichi Seike*)

HAARP strummings

Trees / human interaction

Chronicles: Nexus: European Parliament action on electromagnetic pollution; Australian senator Robert Bell promotes EMF information exchange group; advances with Robert Beck's HIV neutralization system; Swiss M-L Converter developments; WIN Method reports yield gains; nuclear industry underestimated costs of nuclear energy disposal; UFO research grants; Nikola Tesla's Wardenclyffe property at risk; sonar-like UFO sounds; direct conversion of heat into mechanical work patented Bernhard Schaeffer and Albert Serogodski; *Anomalist* launched; Argentinean Secretariat; successful replication of Walter Russell's transmutation experiment in internal plasma vortex fields; electromagnetic sensitivity gains Scandinavian scientific interests; brain

transmitters mass produced while legal cases surface; economic impact of free energy analyzed by Prof. Josef Gruber of FernUniversitat Hagen; clarification of Wiberg's paranormal challenge results.

Volume 8, Number 3 (April 1995)

Eloptic energy and plant life

Cosmic pipe - "cosmiculture" energy farming (*Sarah Hieronymus*)

Spruce budworm control - successful radionics experiment (*Ted J. Klich*)

Radionics as a subtle energy guide (*Lutie Larsen*)

T. T. Brown's classified electrogravitics research (*Thomas Valone*)

Master of anomalies & G (*Joshua Reynolds*)

Caveat Emptor Let the buyer be aware ! - so who is selling ? (*Clement Noel Beauchamp*)

Brown's Gas - extracting precious minerals (*Floyd Farley*)

Chronicles: Nexus: Analysis of Tesla's Colorado Springs notebook by Richard Hull; Hendershot dossier developed by son; MIT cold fusion gathering by Eugene Mallove; Magnetic Resonance Amplifier developments claims overunity; Royal Raymond Rife dossier released; United States Psychotronics Association developing a degree program for radionics; Thornson inertial propulsion systems demonstrates elevated thrust capability; what drives currency variations; punctured cloud structure in Michigan linked to underground facility. *Channel alert.*

Volume 8, Number 4 (February 1996)

Three overunity devices (*Tom E. Bearden*)

Combining water with fuels - improvements by Poeschl (*Wolfram Bahmann*)

Advanced transmutation: the case for nuclear waste disposal

Advanced transmutation: experimental results (*T.E. Bearden, John O'M Bockris, Yull Brown, O. Costa de Beauregard, Hal Fox, A. Michrowski, Elizabeth A. Rauscher, Glen Rein, William A. Tiller, Tom Valone, William Van Bise*)

Somatidian biology (*F. Wayne Grimm*)

Chronicles: Nexus: McLuhan Program on Yull Brown; African secretariat; Hamel's magnetic apparatus; cellular transmission tower concerns; expanded model for the basis of hearing; HAARP tests concerns; 2 mG exposure limit proposed by US National Council on Radiation Protection and Measurements; focused intention to influence material physics; European new energy technology gathering; information storage in water; Correa's pulsed abnormal glow reactor; unsuccessful replication efforts with Swiss M-L Converter, Floyd Sweet's VTA; cloudbusting review; Chukanov's ball lightning/overunity generator; Russian Institute of Free Energy; photons for manipulating of samples; blood flow as propelling heart; blood clearing device; Brown's Gas generators for autonomous houses.

Volume 9, Number 1 (February 1997)

The physics of Brown's Gas (*Les Banki, Yull Brown, A. Michrowski, John Van Rhee, George Wiseman*)

Charge clusters (*Ken R. Shoulders, Steve Shoulders*)

Commentary (*A. Michrowski*)

Low temperature transmutation (*Georgiy S. Rabzi*)

1923 spark transmutation - early charge cluster research (*Rich Murray*)

de la Warr radionic camera (*Peter Moscow*)

Mars: geometric artifacts in *virtual 3-D stereo* (*Greydon Moore - Rhae Livingstone*)

Chronicles: Nexus: UK secretariat; scalars studied by the physics community; Graneau's kinetic energy gains from fog; longitudinal wave propagation studies at York University; successful replication of alchemical transmutation of lead into gold with "soft fusion" by Albert Cau; Wilfred Branfield thesis of light as source of matter; Cincinnati group's electro-nuclear transmutation; alternative energy vehicle research; Puharich's theory of nerve conduction and cellular communication; Puthoff's zero-point energy research. *Nexus/Websites - advanced energy and related subjects. In Memoriam:* Chesley W. Carter, Christopher Bird. *Thoughts worth considering.*

Volume 9, Number 2 & 3 (April 1997)

Sinewaves of spacetime - space movement by time increments (*Philip S. Callahan, Kevin L. Callahan*)

Trilateral spacetime effect (*Alexander V. Frolov*)

Commentary (*Harold E. Puthoff*)

Longitudinal wave tech (*Vladilen I. Dokuchaev*)

Tesla's views on zero-point energy (*Nikola Tesla*)

Electrotherapeutics - commentaries (*Ernst Knoll*)

Electroporation with electrotherapeutic devices (*Panos T. Pappas*)

The role of *melatonin* and *serotonin* in aging (*Bernard R. Grad, R. Rozencwaig*)

Scalar therapeutics (*Andrew Michrowski*)

Brown's Gas for self-sufficient, healthy houses (*Andrew Michrowski, John Van Rhee*)

Chronicles: Nexus: successful replication of gunpowder transmutation process by Albert Cau; water-powered cars by Yull Brown; new US government research and funding priorities; US NRC/National Academy of Sciences report on residential EMF; Jensen's "ring-fire" implosion heater system. *Nexus releases - publications from network. Nexus/Websites - advanced energy and related subjects.*

Volume 9, Number 4 (February 1998)

Perpetual motion ... in conventional electrodynamics (*Tom E. Bearden*)

Reactionless vehicle - momentum and energy from centrifugal forces (*Stefan Marinov, Joerg Deistling*)

Scalar phenomena research (*Andrew Michrowski*)

Electret effect photography (*Philip S. Callahan*)

Chronicles: Nexus: Tewari's successful space power generator experiments; Graneau's progress with kinetic energy derived from fog; geometric patterns effects on DNA generated by scalars reported by Glen Rein; US government's application of "seeded" alien technology; US Defense department's concern for eco-type terrorism (climate, earthquakes, volcanoes) from remote EM waves; US Air Force research on EM weapons for mind, emotion and muscular control; capital base for new energy technologies; jury nullification procedure for alternative medicine trials; bioeffects from radiofrequency and microwaves and concern from insurance community; Lambertson's success with solid-state free energy device; Thomson's impulse propulsion drive and endorsement by Manitoba government. *Nexus/Websites - advanced energy and related subjects. In Memoriam:* Stefan Marinov and Bruce DePalma. *Notices:* Testaments of Disposition of research work; Clean Energy Foundation.

Volume 10, Number 1 (December 1998)

My life with cold fusion (*Edmund Storms*)

Cold fusion in living cells (*Panos T. Pappas*)

Carbon monoxide > iron (*Mark Porringa*)

Chronicles: Nexus: World's financial market/ free energy interface, Russian single wire electric transmission technique by Stansilav and Konstantin Avramenko; annual investment requirements into world's energy sector and Evelyn de Rothschild's plan for year 2004 and beyond; HAARP near-2Hz ELF burst campaign; Alexandr V. Chernetskii's charge separation work replicated by George Egely; details of Smith Coil's caduceus winding to produce longitudinal wave effects; public perception that transmission lines are the major environmental issue reported in survey; "gender-bender" endocrine-disrupting agents linked to *nonyl phenol* and other ingredients in common household compounds; cellular phone PCS service start-up linked to increased mortality for first 4-12 weeks of operation; diets helpful in overcoming electromagnetic sensitivities; findings of the National Institute of Environmental Health Sciences EMF RAPID project regarding the evidence of hazards associated with exposure to 50-60Hz electromagnetics; Canada Mortgage and Housing Corporation finds car engines can efficiently generate emergency power for homes; long-life nickel metal hydride electrode batteries; health effects of cellular phones determined by Vienna University symposium. *Nexus/note gemss - perpetuum mobile:* electric bell at University of Oxford ringing since 1840; atmospheric clock running since 1864 at the University of Otago, New Zealand. *In Memoriam:* Yull Brown and Hans A. Nieper.

Volume 10, Number 2&3 (January 1999)

Charge cluster energy devices (*Hal Fox*)

The autogeneous PAGD technology (*Paulo N. Correa*)

Commentary: on the politics of science (*Paulo N. Correa*)

Space and consciousness (*Andrew Michrowski*)

Mind-aided vacuum energy release (MAVER) (*Demeter G. Chakalov*)

Mind-aided electrical circuits (*A. Michrowski, J. Gagnon, D. Major, G.A. Obolensky, B.A. Perreault, M. Theriault*)

Ions: a review (*William Lee*)

Chronicles: Nexus: Paramahansa Tewari developments; International Tesla Society may be closing down and Exotic Research offers follow-up; historical research on free energy (including J.W. Keely) by Theo Paijmans; Replication research of the Methernitha community's Testatika device by Don Kelly; Brandson Roy Thomson inertial propulsion system computer modeled for satellite applications; relationship between longitudinal electrodynamic wave and transmission efficiency demonstrated by Charles Yost and Ronald Kovacs; excessive heat and helium-4 produced from deuterium gas by Les Case; using musical harmonies as analogies for understanding spacetime and symbols demonstrated by Barbara Hero and Robert Foulkrod; Marinov motor can acts as detector of scalars and its functioning is supported by several eminent physicist and researchers; Glen Rein demonstrates music converted into scalars has beneficial effects on DNA. *In Memoriam:* George T.F. Yao and Ralph Bergstresser.

Volume 11, Number 1&2 (June 2000)

Brown's Gas applications (*Andrew Michrowski*)

Endeavor's traces: EM hash grid-fields (*Elizabeth A. Rauscher*)

Deep penetration of dense electromagnetic noise (*Thomas E. Bearden*)

EM hash updates (*Arthur Firstenberg*)

Plasma discharges, charge clusters – windows into the ether (*Andrew Michrowski*)

Implications of the *somatid* (*Jacinthe Levesque, Andrew Michrowski*)

Persistent cloud formations (*Jim Tufts*)

Chronicles: Nexus: Over-efficiency confirmed for Paramahansa Tewari's Space Power Generator; 80% success rate reported with cold fusion experiments at the Japanese New Hydrogen Energy Laboratory before it is shut down; White House requests submissions for new policy directions – Eugene Mallove and Arthur C. Clarke among 40 respondents; Denmark makes clean energy a good business; indoor air pollutes outdoors in US; significant developments in worldwide deployment of photovoltaics; UNESCO Manifesto for a culture of peace and non-violence; Monti technique for the rapid reduction of radioactivity in thorium²³²; European Parliament takes a stand against electromagnetic weaponry, nuclear hazards and HAARP; UNDP reports 200 individuals have as much wealth as 41% of world's population; personal computers are consuming more electric power, putting in jeopardy energy conservation hopes; sudden deaths and health problems worldwide associated with flight passes by *Endeavor's* "earth tomography" radar scans; US patent granted to Randell Mills for releasing energy from hydrogen atoms by stimulation of their electrons; low-energy nuclear reactions defined by John O'M. Bockris; forecasts for worldwide access to safe water; Mark Poringa successfully reduce radioactivity of Am241 to 4%-6% range within 10 seconds of exposure to Brown's Gas; Yucca Mountain, Nevada may become site for storage of US spent nuclear fuel waste; compendium of high mileage car engine techniques available; Emerging Energy Marketing Firm acquires exclusive rights to several US patents for charge cluster technology; Orgone Biophysical Research Laboratory offers educational programs and orgone products; Wingate Lambertson technology has applications for high-intensity discharge lamps; a hydrogen-oxygen-carbon gas, AquaFuel has applications in engines, power generation and welding; significant strides in Tesla engine and Tesla turbines reported; Russian report successful, super efficient wireless transmission of electrical energy; US reports alternative medicine as showing greatest growth in health care market; George Wiseman's Brown's Gas technology has 95% gas producing efficiency. *In Memoriam:* John A. Mattingly, John Nash Ott and Fred Soyka.

Volume 11, Number 3 (January 2001)

SWEPS: novel electric power transmission technology (*Dmitry S. Stebkov, Stanislav V. Avramenko, Aleksei I. Nekrasov*)

Commentary (*Thomas E. Bearden*)

Out of the energy crisis (*Thomas E. Bearden, Josef Gruber, Win Lambertson, Andrew Michrowski*)

New physics volume explains “free energy” (*Alain Beaulieu*)

Brown’s Gas radioactivity decontamination results (*George Hathaway, Mark Poringa*)

Aspects of vitality (*Eldon Byrd, George Egely, Andrew Michrowski, Glen Rein*)

Chronicles: Nexus: rapid SAR measurement technology offered for testing radiation from wireless devices by APREL Laboratories; measure taken by European Union for radiofrequency exposures; coupling between radio station and cellular antennae observed to magnify induced currents and fields in certain soil conditions; Salzburg resolution on mobile telecommunication base stations to Polish standard; White House Commission on Complementary and Alternative Medicine Policy holds hearings; over-balance type of gravity wheel/motor proposed by Donald Kelly; National Foundation for Alternative Medicine reports encouraging results in clinical results of centres administering non-conventional treatments outside of Canada and US; share of renewable energy resources may reach 50% by the 2050, according to Shell; FT Canada reports doubling of combustion efficiency with its Watargas; digestive tract may serve as a “second brain”; David Hamel’s technology being replicated by Chris Felton and Robert Thomas; Daniel Haley compiles detailed analysis of 10 successful and non-toxic cancer cures as well as a legislative proposal to disable US Food and Drug Administration from prohibiting non-toxic but successful products and devices; Indian conference on space physics; PBS TV network to air Tesla: master of lightning by Robert Uth; Tesla turbine at 2,000 rpm found to be commercially viable.

Volume 11, Number 4 & 5 (February 2003)
--

Low energy induced nuclear fusion (*Mark Poringa*)

Consciousness technologies (*Eldon Byrd*)

The fungal nature of cancer (*Ronald Gdanski*)

Time (*Andrew Michrowski*)

Chronicles: Nexus: Wingate Lambertson’s WIN energy system concludes 6th successful round of certification; Brandson Roy Thomson’s inertial propulsion system is being upscaled; George Wiseman begins production of new 1,200 Brown’s Gas generator; Ontario committee briefed on Brown’s Gas technology for re-commissioned nuclear power plants; New method for protecting intellectual property: *Intellectual Passport*; Bernard Labelle’s *Velocimeter* dramatically reduces soot and carbon monoxide in any combustion engine; Germany endorses unconventional approaches for sustainable development: Günter Pöschl’s *Radigen*, Paulo Correa’s plasma discharge power generator (*PAGD*), *charge clusters*, Randell Mill’s *Blacklight* and *Brown’s Gas*; Alvin Mark’s Lumeloid solar nano-technology completes R&D, ready for manufacturing; experimental review of Edgar Cayce’s *Radial Device*, *Wet Cell*, *Castor Oil Packs*, *Atomic Iodine* and *Animated Ash* described in new book by Phil Thomas, *Beyond theory: Edgar Cayce’s natural health*; Laszlo Szabo’s EBM Power Plants for 30kW – 10MW commercial power being sold; Robert Becker succeeds in regenerate stem cells with novel silvered nylon fabric technology; Effective high pH Cs and Rb salts procedure for rapid shrinking of tumour masses disclosed in new edition of *Politics of healing* by Daniel Haley; Systems model based on tropical rain forest ecology may serve as guide for sustainability of innovation, development, wealth and business activity proposed by Tachi Kuchi and Bill Shireman; United Nations Development Programme analysis critical policies in energy to address development; John Hutchison makes available his crystal power *Q Cell* permanent battery; Novel demonstration and training programs offered by Findhorn Foundation and The Farm, with backing of United Nations; Permaculture courses offered; Microwave emissions may co-trigger violence and autism; Microwave-powered sulfur lamps being introduced; *Osprey Class* NATO minehunters based on Philadelphia Experiment research; Gilles Saint-Hilaire’s *Quasiturbine* has high energy density/power ratio can be used for air, steam, nitrogen, water and oil and Brown’s Gas fluids; US Department of Energy foresees growth in world energy use, without significant input of renewable, new energy sources; Chernobyl nuclear power plant explosion still affecting population and economy of Ukraine; World facts on energy, water, wealth, environment; Motionless electromagnetic generator (MEG) patented and to be independently replicated and tested by a university; Analysis of fuel efficiency is medium and heavy-duty trucks by Efficiency Analysts Group leads to package solution that includes Brown’s Gas and offers more than double mileage; Russian State Duma expresses concern about HAARP, considered as a new geophysical weapon of mass destruction; Akio Mori indicates video games cause non-reversible brainwave activity decreasing ability to converse and work; Monti Process successful demonstrated for the rapid reduction in nuclear waste at Stockholm’s Royal Institute of Technology. *In Memoriam:* Clément Noël Beauchamp, Eldon Byrd, Robert C. Beck, Paul Brown and James R. Shaw. Mark Twain’s comments about innovation.

NEWSLETTER

Planetary Association for Clean Energy

Occasional publication of the Association

Back issues sold *per Volume*, at **current subscription rates**. Orders may be placed for specific articles at **\$ 2.50** per article, Chronicle feature + **\$ 2.00** shipping charges per lots of 5 requested items or less.

Current subscription rates: \$ 40.00 (Canada), \$ 45.00 (U.S), \$ 50.00 elsewhere.
